

Polymax Cyanoacrylate Cord Adhesive 5g

Product SKU:	3005016
Weight:	0.1 Kg
Colour:	Clear
Capacity:	4.76ml
Operating Temperature Range:	-50°C to 80°C

Key Features:

Fast Curing Time: Cyanoacrylate sets quickly, providing instant results for your bonding needs.

Versatile Bonding: Perfect for a wide range of materials including metal, plastic, rubber, wood, ceramics, and glass.

Strong Adhesive: Delivers a durable bond that withstands the test of time, even in demanding conditions.

Clear Finish: Dries clear, ensuring a seamless look without visible residue, ideal for crafts and repairs.

Precision Application: Designed for easy application, making it suitable for detailed tasks and intricate designs.

Applications:

Our cyanoacrylate adhesive is your go-to solution for a variety of bonding applications. Whether you are engaged in general bonding tasks, quick repairs, or specialised projects, its versatility shines through:

General Bonding: Use it for bonding materials like metal, plastic, rubber, wood, ceramics, and glass in numerous DIY, household, and industrial applications.

Repair Work: Perfect for fast repairs of broken items, such as ceramics, toys, or household items, thanks to its rapid curing time and robust bond.

Electronics: Ideal for bonding small parts and components in electronics, including circuit boards and connectors, where a strong, mess-free hold is essential.

Crafts and Models: Widely used in crafting and model-making, this adhesive bonds various materials with precision and speed.

Automotive Repairs: Effective for fixing small cracks and bonding trim or plastic parts, adhering quickly without the need for clamping.

Jewellery Making: Perfect for attaching small gems, rhinestones, or components, offering a clear and strong bond.

Woodworking: Ideal for bonding small parts and for tasks requiring quick drying times, especially in intricate designs.

Footwear and Leather: Commonly used for shoe repairs, effectively bonding leather and rubber materials for durable fixes.

Glass Repair: Efficient in bonding and repairing cracks in glass or mirror surfaces, providing a clean solution for minor breaks.

Although the technical details and recommendations made correspond to the best of our knowledge and experience, all the above information must, in every case, be taken as merely indicative and subject to confirmation after long-term practical application; for this reason, anyone who intends to use Polymax products must ensure beforehand that it is suitable for the envisaged application. In every case, the user alone is fully responsible for any consequences deriving from the use of the product.
