

Polymax Cyanoacrylate Cord Adhesive 10g

Product SKU:	3005017
Weight:	0.02 Kg
Colour:	Clear
Capacity:	9.5ml
Operating Temperature Range:	-50°C to 80°C

Key Features:

Fast Curing: Our cyanoacrylate adhesive sets quickly, allowing you to complete your projects in no time.

Strong Bonding: Provides a durable and robust bond for a wide variety of materials including metal, plastic, rubber, wood, ceramics, and glass.

Clear Finish: Dries clear, ensuring a seamless appearance for all your bonding needs.

Precision Application: Ideal for intricate tasks, enabling you to bond small parts with accuracy.

Versatile Use: Suitable for numerous applications, from DIY projects to professional repairs.

Applications:

Our cyanoacrylate adhesive is perfect for general bonding tasks, making it an essential tool for both household and industrial applications. Whether you're bonding materials like metal, plastic, rubber, wood, ceramics, or glass, this adhesive excels in providing a strong hold.

For repair work, it's your go-to solution for quickly fixing broken items such as ceramics, toys, or household goods. Its fast curing time ensures that you can get back to your routine without delay.

In the realm of electronics, this adhesive is invaluable for assembling small parts and components, including circuit boards and connectors, allowing for a mess-free application that holds firmly.

For enthusiasts in crafts and model-making, this adhesive bonds various materials such as plastic, wood, and metal with speed and precision, perfect for detailed projects.

In automotive repairs, it effectively fixes small cracks and bonds trim and plastic parts without the need for clamping, ensuring a reliable hold.

Jewellery makers appreciate its ability to attach small gems and components securely while leaving no visible residue, making it ideal for intricate designs.

Carpenters and woodworkers will find it indispensable for bonding small parts and completing delicate assemblies where quick drying is essential.

Finally, for footwear and leather repairs, it offers a strong bond for leather and rubber, delivering durable fixes for minor tears or loose soles, while also excelling in glass repair for cracks or breaks, providing a clean and efficient solution.

Although the technical details and recommendations made correspond to the best of our knowledge and experience, all the above information must, in every case, be taken as merely indicative and subject to confirmation after long-term practical application; for this reason, anyone who intends to use Polymax products must ensure beforehand that it is suitable for the envisaged application. In every case, the user alone is fully responsible for any consequences deriving from the use of the product.
