

Momentive SS4179 Primer for Plastic Clear 407g

Product SKU:	3005020
Weight:	0.39Kg
Colour:	Clear
Capacity:	407g

Key Features:

The SS4179 Momentive Primer for Plastic Clear (407g) is an advanced primer formulated specifically to enhance the adhesion of silicone-based adhesives and sealants to various plastic surfaces. Its clear formulation provides a seamless application while ensuring optimal bonding performance. Key features include:

Enhanced Adhesion: Designed to significantly improve the bond

strength between silicone materials and plastics, ensuring durable and reliable results.

Versatile Compatibility: Works effectively with a wide range of plastic materials, including polycarbonate, acrylic, PVC, and ABS.

Quick Application: Easy to apply, allowing for efficient project completion without compromising on quality.

Durable Results: Provides long-lasting adhesion, making it suitable for both indoor and outdoor applications.

Clear Finish: The clear formulation ensures that the appearance of the surface remains unaffected after application.

Applications:

The SS4179 Momentive Primer for Plastic Clear is ideal for numerous applications, making it a versatile choice for professionals across various industries. Common uses include:

Plastic Bonding: Perfect for enhancing the adhesion of silicone sealants and adhesives to a variety of plastic materials, ensuring a strong bond.

Automotive Applications: Essential for bonding silicone sealants to plastic components in vehicles, including trim, moldings, dashboards, and weatherstripping.

Electronics: Improves adhesion between silicone materials and plastic parts in electronic devices, such as housings, displays, and connectors, ensuring secure and reliable bonding.

Construction: Used in construction projects to ensure stronger bonds between silicone sealants and plastic materials in windows, doors, facades, and interior elements.

Medical Devices: Vital in medical device manufacturing, enhancing bonding between silicone sealants and plastic components for durability and reliability.

Packaging: Enhances the adhesion of silicone sealants to plastic containers, providing airtight and watertight seals for superior packaging performance.

Aerospace: Utilised in aerospace applications for bonding silicone sealants to plastic components in aircraft and spacecraft, ensuring safety and performance.

Although the technical details and recommendations made correspond to the best of our knowledge and experience, all the above information must, in every case, be taken as merely indicative and subject to confirmation after long-term practical application; for this reason, anyone who intends to use Polymax products must ensure beforehand that it is suitable for the envisaged application. In every case, the user alone is fully responsible for any consequences deriving from the use of the product.
