

Red and White Post with 2m Chain

Product SKU:	1122131
Colour:	Red and White
Width:	250mm
Height:	1000m
Length:	2m

The Red and White Post with 2m Chain is a versatile and practical safety barrier system designed to effectively control access, direct foot traffic, and mark off restricted areas. This system consists of a durable, high-visibility red and white post paired with a 2-meter plastic chain, providing a simple yet effective solution for a variety of settings, including events, parking lots, warehouses, and public

spaces.

Key Features:

High Visibility:

The post and chain feature alternating red and white colors, drawing attention and signaling caution. This high-visibility design ensures that the barrier is easily noticeable, even from a distance.

Durable Construction:

Made from robust and weather-resistant materials, the post and chain are designed to withstand outdoor elements, including rain, wind, and sunlight. This durability ensures that the system can be used both indoors and outdoors.

Portable and Easy to Set Up:

The post is lightweight and easy to transport, making it simple to set up and reposition as needed. The 2-meter chain can be quickly attached to multiple posts to create a continuous barrier, offering flexibility in configuring the layout to suit different spaces and needs.

Sturdy and Stable:

The post is designed with a wide, stable base that can be filled with sand or water to provide additional weight, ensuring it remains securely in place, even in windy conditions. This stability is crucial for maintaining the integrity of the barrier system in busy or outdoor environments.

Versatile Applications:

This post and chain system is ideal for a wide range of applications. It can be used to section off areas at public events, manage pedestrian flow, mark parking spaces, or create safety zones in industrial and construction sites. It is also useful for temporary crowd control and directing visitors in commercial settings.
