

1m Length Self Adhesive Foam Edge With Slot 1000L x 100Dia

Product SKU:	1122144
Material:	Ethylene-Vinyl Acetate (EVA)
Colour:	Black-Yellow
Length:	1000mm
Diameter:	100mm
Weight:	0.5kg

The Polymax Self-Adhesive Foam Edge Protector is a practical solution for safeguarding edges and corners, specifically designed to fit plates, beams, and structural elements. With a 1-meter length and 100mm diameter, this protector offers excellent cushioning and impact resistance. The 8mm slot ensures easy installation on various surfaces, providing a secure fit without requiring additional tools.

Durable & High-Visibility Design

Constructed from high-quality foam, this edge protector prevents equipment damage and reduces the risk of injury to personnel. Its bright yellow color enhances visibility, making it easy to spot in high-traffic or low-light environments. Ideal for workplaces where sharp edges and protruding corners pose safety risks.

Versatile Applications

Perfect for use in:

Warehouses: Protect shelving, beams, and machinery from accidental impacts.

Factory Floors: Safeguard equipment and workers from sharp edges and corners.

Construction Sites: Cover exposed edges and beams to minimize injury risks.

Industrial Settings: Ideal for beams, plates, and other structural elements requiring protection.

Key Features

Self-Adhesive: Secure attachment with adhesive backing—no tools required.

8mm Slot: Designed to fit plates, beams, and structural elements perfectly.

Durable Foam Construction: Superior impact resistance and cushioning.

High Visibility: Bright yellow design ensures clear hazard identification.

Optimal Dimensions: 1000mm length, 100mm diameter, 8mm slot for easy installation.
